KEBARCO CONSTRUCTION COMPANY ● ● ●

Introduction:

Kebarco is a construction & Drilling company which is one of divisions that form the Kebar Umbrella that hosts a number of companies that provide a range of services from Manufacturing, electrical engineering, Drilling, Pipe Fitting and trading

Kebarco had a regional and national dream that became real after the company has obtained the necessary expertise, purchased the required equipment and received international recognition in the field of construction

Introduction:

With the engineering, Drilling and construction boom that is occurring in Puntland in particular and in Somalia in General and the desire to improve overall profit margins, the company has shifted target market from Gulf of Arabia clients to East Africa and has been working for the last ten years. Kebar is ready to work with the existing local construction, Drilling companies and sub-contractors in order to create a working environment that is based on cooperation and skill transfer in order to bush the civil engineering to cope with the national development with positive competition.

OUR VISION

We are committed to becoming the contractor of choice, pursuing excellence through dedication and experience with continuous enthusiasm to deliver quality, .timely, long lasting and profitable projects

OUR MISSION

Our mission is to be a dynamic team, providing the highest quality construction .and drilling services available in the region

Core Values

- Work Ethic
- Accountability
- Dedication
- Safety
- Commitment
- Optimism
- Quality
- Trust

ROAD DEVELOPMENT

Kebarco believes that roads improve transportation that will increase public wealth. People depend on road in their daily life – to get to school, to work, or to the health centre. Roads underpin the businesses, agriculture and trade which provide the jobs that lift nations out of poverty. However, road projects are costly.

SAFE AND SUSTAINABLE

Although road projects are costly many roads are washed out by rains which are the worry of the tax payers who will not be able to raise more money for road construction again. This specific issue of poor roads is what Kebarco will strive solving it for good

WATER DRILLING

kebarco water well drilling section has many years of experience in successful deep water well drilling activates. We can give our clients the best service with our experience and profession

Our rigs are equipped to drill with both bentonite [mud] and air [with foam]. We develop the boreholes after the completion of the drilling by air lifting. The drilling capacity of our rigs is five handrerd meter

SUSTAINABLE BUILDING DESIGNS AND CONSTRUCTION

To make buildings sustainable, we design for better performance from every angle. At Kebarco, we consider how all elements of a building's design work together to meet the needs of its owners, occupants and environment.

TKebarco believe that it is only by considering the total building design that we can create buildings that are efficient with resources, affordable to build and operate, good to inhabit and appropriate to their context. Environmentally-conscious builders look for durable building materials that leave the smallest environmental footprint. Produced from locally available, abundant materials, concrete's long lifespan helps make it the most responsible choice for a sustainable future.

SAFETY FIRST

OUR PEOPLE

Beyond bricks and rollers, people are the backbone of our business. We value relationships with the people we serve—our clients, contractors, suppliers and associates. Together we can enhance the quality of life for all. Since we believe that buildings are a reflection of the people who build them, we hire leaders of esteemed character who are fair, kind and considerate. By attracting and retaining the best construction professionals in our industry, we are able to maintain the highest standards and ethics. When you work with Kebarco Company, you will experience positive attitudes, flexibility, transparency, timeliness, and quality workmanship.

OUR COMMITMENT TO SAFETY

People are our greatest resource and most valuable asset. We value their safety above all else. Our Safety Program is rooted in the belief that when you put people first, success will follow. Our Value-Based Safety Program requires worker buy-in and global thinking, as opposed to a Priority-Based Program which emphasizes specific tasks, outcomes and statistical results. Safety is everyone's job. We encourage employees to think of working safely as protecting their neighbors, their families and their friends. Safety is a way of life and a constant endeavor. Our goal is simple: we want every worker to go home safely to their families every night
